		<i>Note that drugs have payment rates displayed because the BBRA identifies 95 percent of average wholesale price (AWP) as the payment we must make for drugs and biologicals, including radiopharmaceuticals. Payment for devices is based on the individual hospital's charge for the device, reduced to cost by that hospital's cost-to-charge ratio. New technology is paid according to the new technology ambulatory payment class in which it is placed, based on our best information about costs.</i>
